Description

This item is available with out the box.

Easy to apply, discreet and lasts all day. Aquamatch active concealer safely blends scalp and hair colour together to conceal areas of thinning hair, scars, and wide partings. Aquamatch is highly water resistant and designed to be used with Nanofibres for the perfect look.

Aquamatch is applied very precisely and therefore will conceal thinning close to your hairline, or in small areas such as scars, yet still look completely natural when blended in.

Aquamatch is designed for active lifestyles, it is highly portable and you do not need to mix it with water or fiddle with a messy applicator. Aquamatch packaging is discreet and makes no mention of hair camouflage at all.

Water Resistant

Aquamatch can be blended in for up to 10 minutes after application. After this time Aquamatch "dries" to become water resistant, and will not rinse off even when completely immersed in water.

Locking Mist Plus will further improve the water resistance for complete confidence in all conditions.

Treatment Concealer for Male and Female Thinning Hair

Not only is Aquamatch safe to use on your hair and scalp every day, it has been designed specifically to deliver beneficial treatment actives directly to the skin. Nanogen's unique formula also allows hair to grow completely normally and does not affect the penetration of topical treatments. Every Nanogen product is formulated specifically to be gentle on male and female thinning hair whilst maintaining efficacy.

Complete Hair Camouflage

Combine Nanogen Conceal & Style products to thicken any area of thinning hair. First apply Aquamatch directly to the scalp as a subtle base layer to conceal scars, hairlines and wide partings. Then apply and blend in Nanofibres for real hair density. Secure them in place all day through wind, rain, perspiration and even underwater with Hair Fibre Locking.

-
1. For best results, first cleanse the hair using Hair Prepare and then either Daily Volume or Follicle Defence.
 2. Apply generously over the thinning area, not closer than 5mm to your hairline.
 3. Blend in gently with a fingertip, particularly at the edges for a natural look.
 4. Leave to dry for at least 10 minutes before exposing to water or applying Nanofibres, always avoid touching where possible.
 5. Apply Locking Mist Plus afterwards to dramatically improve water resistance.

-
- Water resistant opaque polymers
Subtle, water resistant scalp coverage
 - Saw Palmetto extract
Slow release treatment active
